

Can be done w/o Telescope

Can be done daytime

Need night runs

Procedure for coordinate transform

Repeat at different observing runs and check stability against PFI and POpt2 installation

Procedure

Sub process

Success criteria

Abbreviations

EL: Elevations

MCS: Metrology Camera

PFI: Prime Focal Instrument

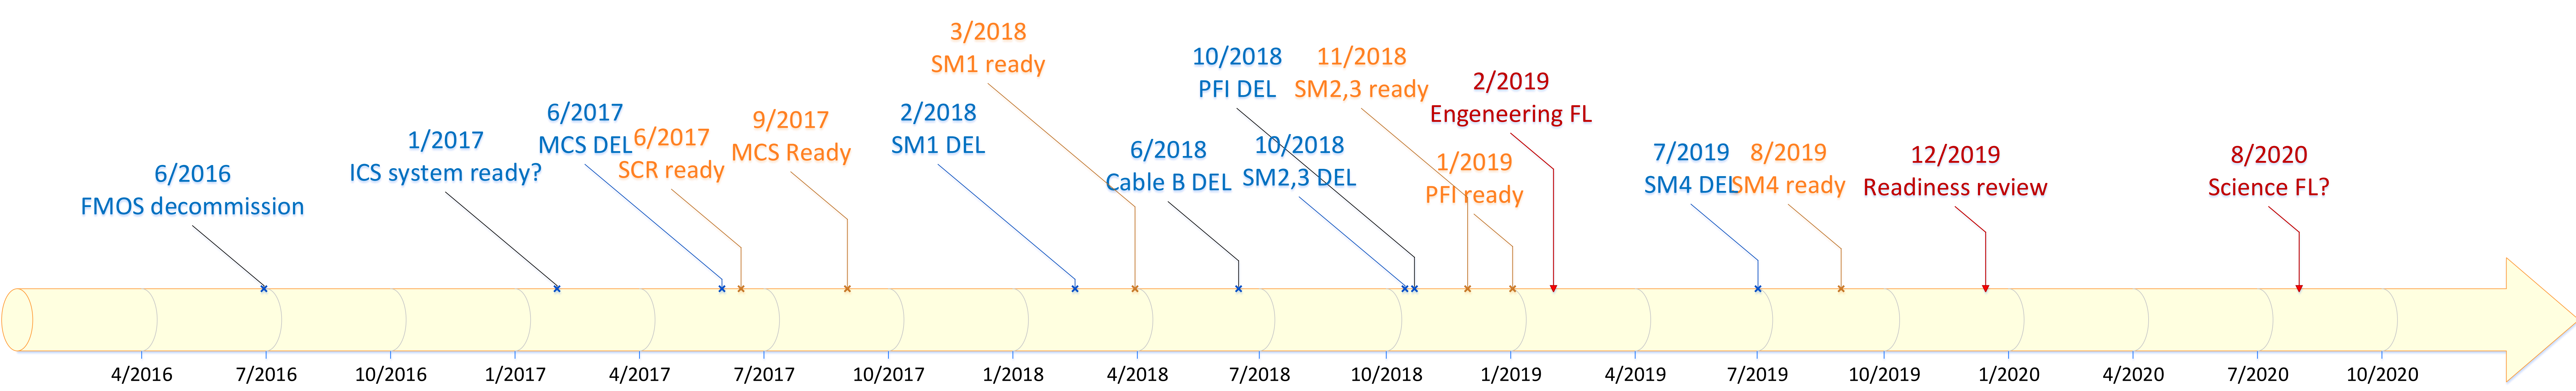

ROA: Rotation Angle

SCR: Spectrograph Clean Room

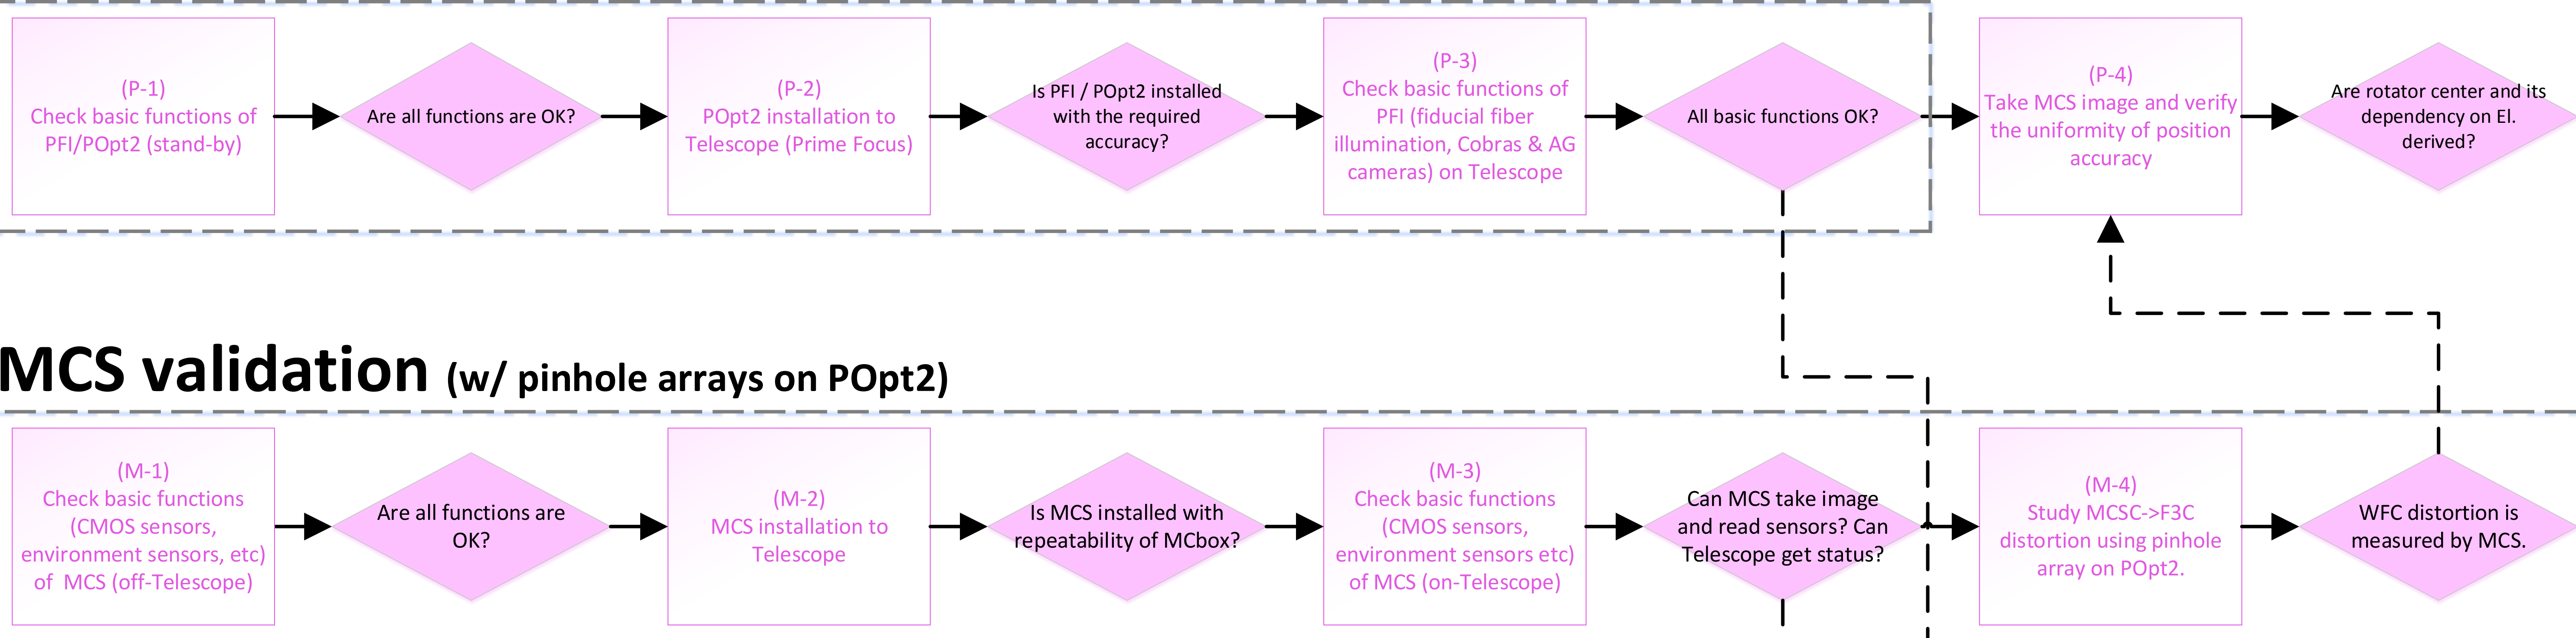

SM: Spectrograph Module

SpS: Spectrograph Subsystem

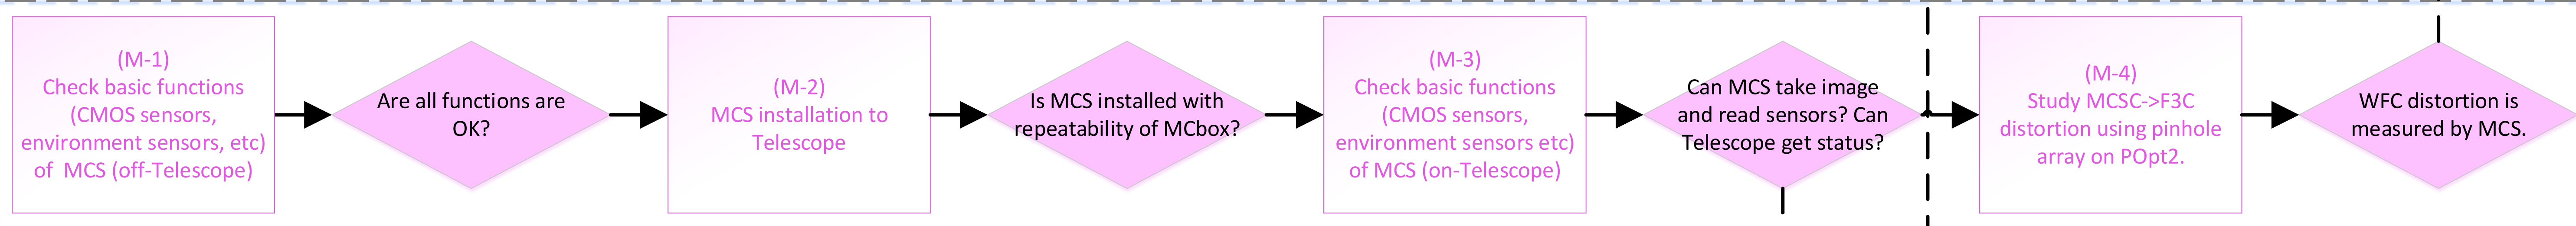

TPA: Telescope Pointing Analysis

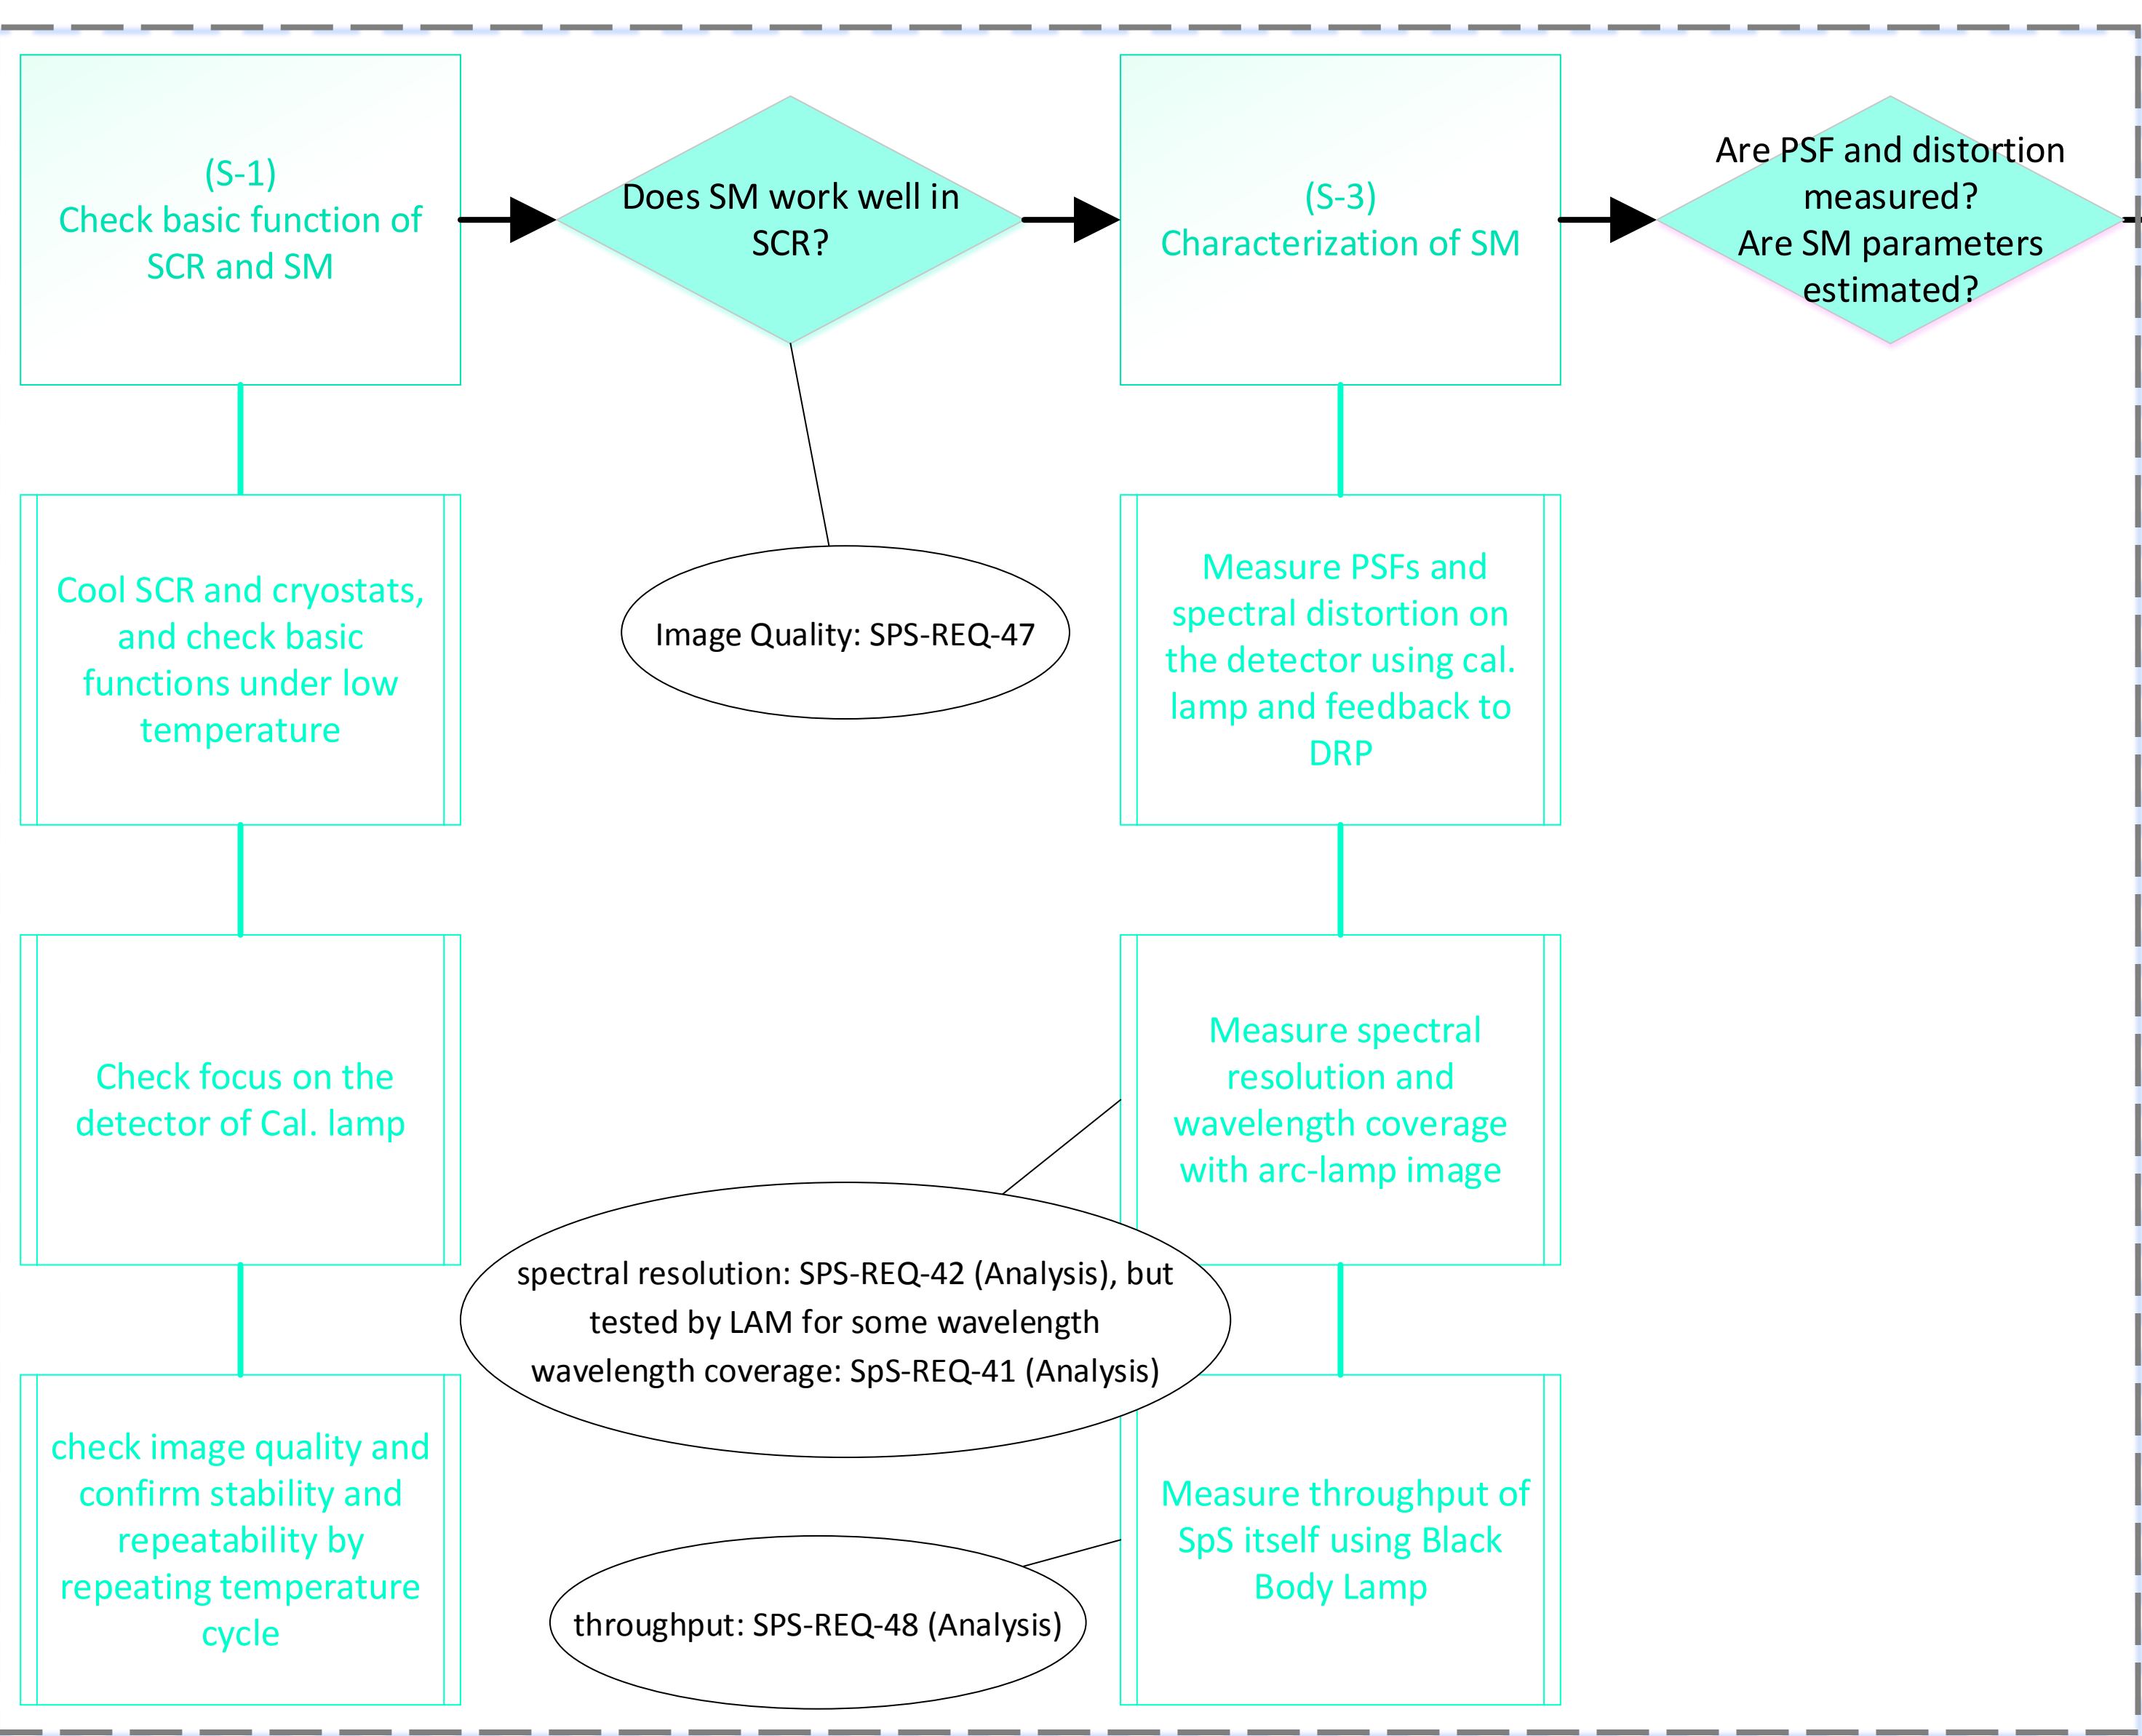

PFI validation

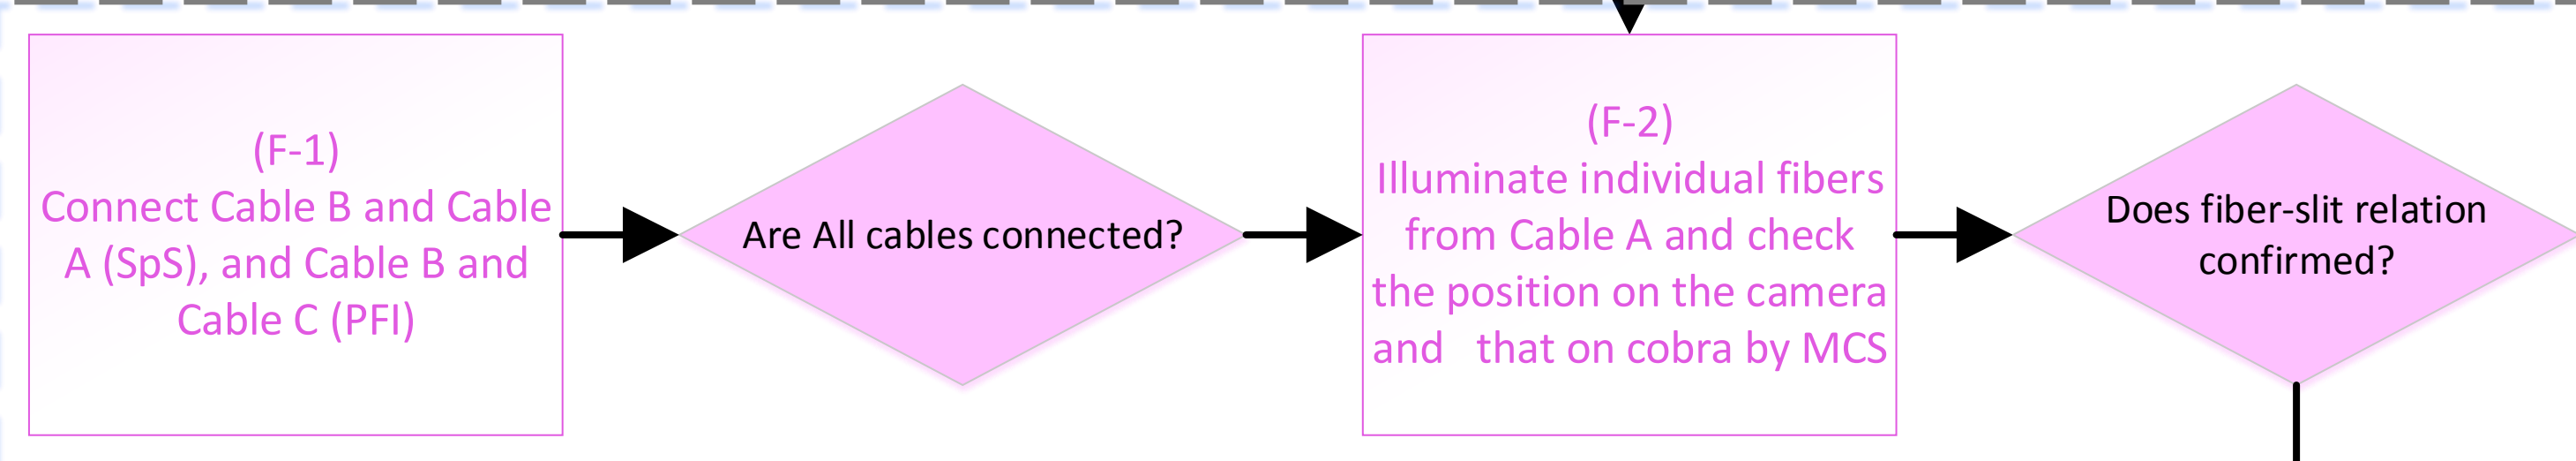

MCS validation (w/ pinhole arrays on POpt2)

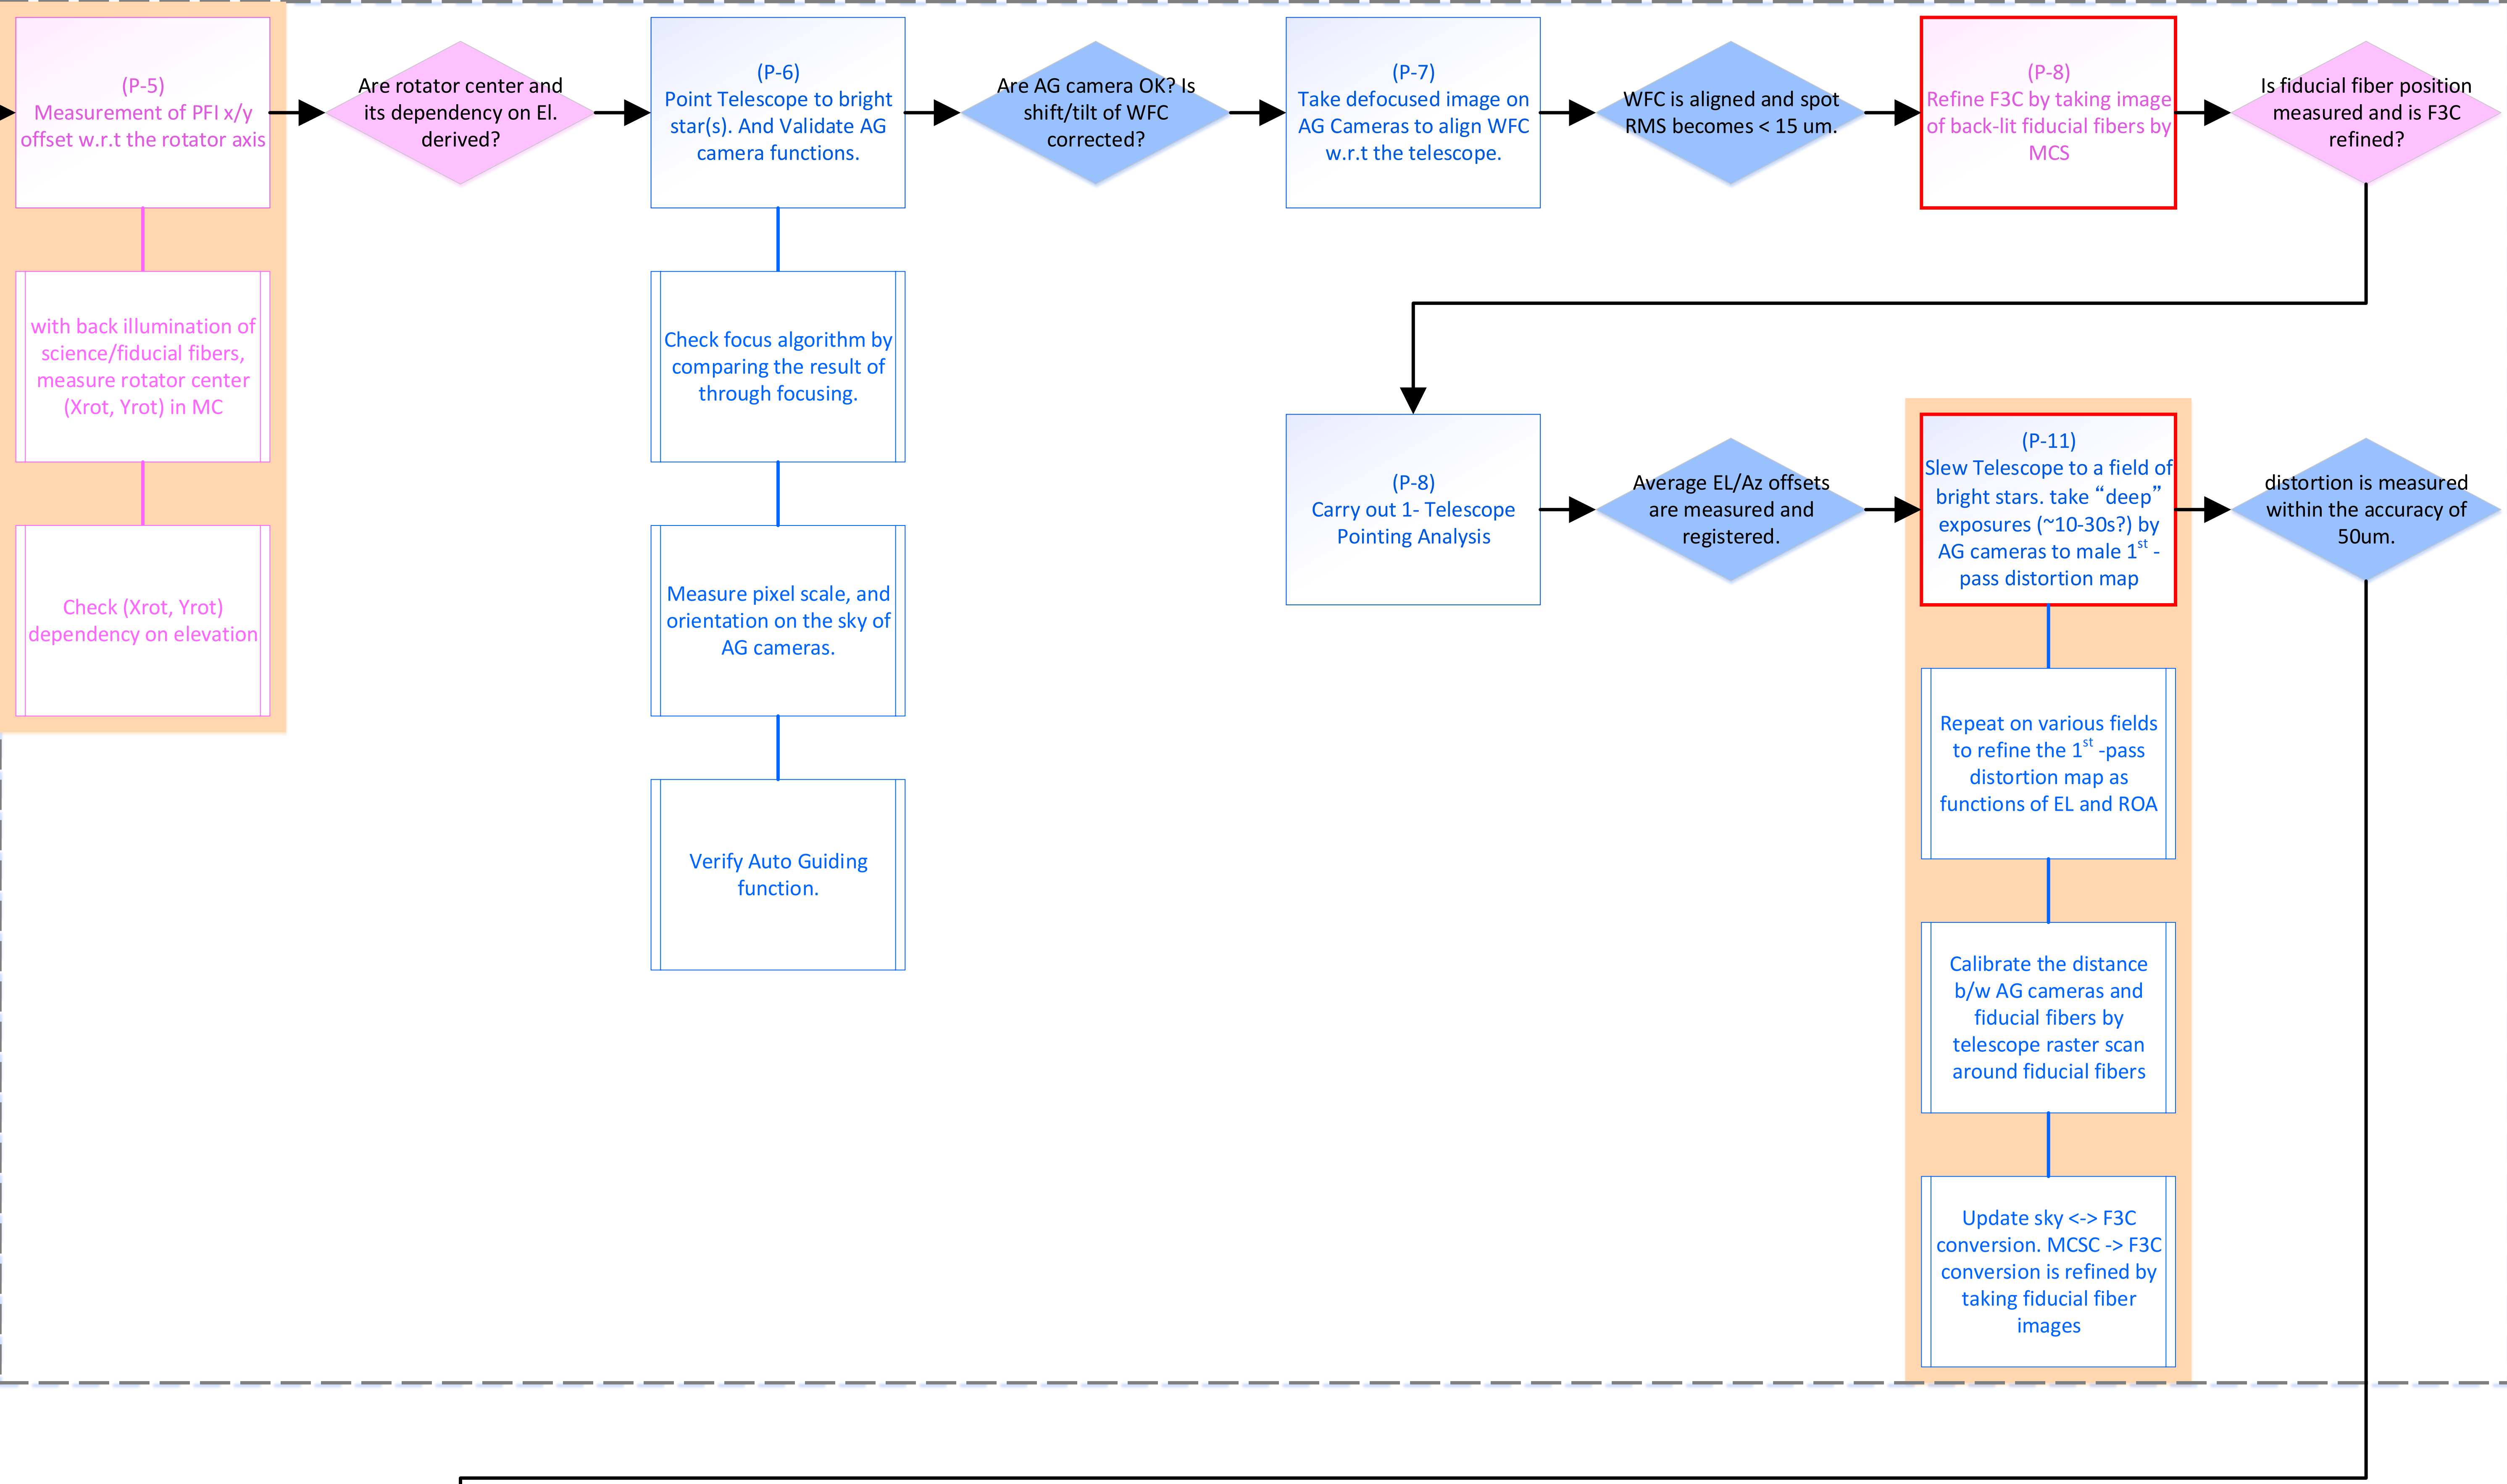

SpS validation

FoCCoS validation

PFI and MCS

All Systems validation & commissioning
